A Smarter Way to Monitor Video

Avigilon Control Center 7 Software

Video Security, Transformed

Avigilon Control Center (ACC) 7, our latest and most advanced version of ACC™ video management software, is designed to revolutionize how users interact with and gain situational awareness from their video security systems.

Focus of Attention Interface

Introducing Focus of Attention — a cutting-edge user interface for live video monitoring that leverages AI and video analytics technologies to determine what information is important and should be presented to security operators.

AI-Powered Analytics

Using our deep learning video analytics and Unusual Motion Detection technologies, ACC 7 software is designed to provide customers with actionable information to help ensure critical events don't go unnoticed.

Dark Mode

ACC 7 software introduces a new theme with colors specifically chosen to reduce eye strain and improve user experience in dark environments, such as video security control rooms.

Appearance Search

Search Made Simple

GENDER: FEMALE

UPPER BODY COLOR: RED

Personal Characteristics

Gender

Upper Body Color

Find Appearances After This
Searches all cameras for this person after this point

Find Appearances Before This
Searches all cameras for this person before this point

Additional Search Options

Avigilon Appearance Search™ video analytics technology is a sophisticated deep learning AI search engine for video. It sorts through hours of video with ease, to quickly locate a specific person or vehicle of interest. Appearance Search can improve incident response time and enhance forensic investigations by helping operators compile robust video evidence, create a powerful narrative of events, and reveal a vehicle or individual's route or last-known location.
Integrated Solution

Integrated with Avigilon Control Center (ACC) 7 and ACC™ 6 Enterprise edition software, Avigilon cameras with self-learning video analytics and select Avigilon Network Video Recorders (NVRs).

Initiate Searches Based on Physical Descriptions

Allows operators to search for a person by selecting certain specific physical descriptions, including clothing color, gender and age categorization.

Search Across Multiple Sites

Initiate a search for a person or vehicle of interest across one site, then continue the search for the same subject of interest by seamlessly transitioning from one site to the next site that uses the same version of ACC software.

Face Analytics Included in Search

Incorporating the unique characteristics of a person's face enables the Appearance Search technology to understand that it is searching for the same person, even if items such as their clothing change over time.

Playback, Bookmark and Export Tools

Build a comprehensive set of video evidence from multiple video sources, to create a powerful narrative of events.
