

The Chromebook experience you love.
The PC you already have.

Built on the same open-source foundation as Google's Chrome OS, CloudReady delivers the Chromebook experience on PCs and Macs up to 9 years of age. CloudReady provides an affordable and easy way to deliver the experience your students and teachers want, on the hardware you already have.

THE VERGE

"A no brainer"

**Shelton Public Schools,
Connecticut**

"Puts machines back in the hands of students"

THE WALL STREET JOURNAL.

"A whole new life awaits your old laptop"

**Ovid-Elsie Area Schools,
Michigan**

"Gets technology out of the way"

CNNMoney

"Makes old machines feel new again"

**Waller Independent School
District, Texas**

"Wow. Here is our solution"

Broad Hardware Compatibility

CloudReady is certified to run on nearly 200 of the most common PC and Mac hardware models. The lightweight, browser-based design installs in minutes and puts older machines back into the hands of students.

Google Admin Console Enrollment

You can manage CloudReady machines right alongside Chromebooks, using the settings you've already created. Many devices of many ages. One platform.

Automatic Updates & Dedicated Support

Just like Chromebooks, CloudReady machines are automatically updated with the latest security fixes and performance enhancements. With dedicated support available via phone, email and online chat, you can always get the help you need.
