

# zSpace

## Classroom Solutions

### Inspire Curiosity

zSpace creates engagement through exploration and experiential learning in a student-centered environment.

### Build Confidence

zSpace develops confident learners by providing them with safe environments and unlimited supplies to experiment with concepts.

### Deepen Understanding

zSpace encourages students to inquire, take risks, and solve problems while building background knowledge to be successful.

## zSpace Takes Learning Into New Dimensions

### General Applications

The zSpace Studio is a rich model exploration and presentation tool that allows students to compare, dissect, analyze, measure, annotate and explore thousands of 3D models.

### Advanced Sciences

The Human Anatomy Atlas is an award-winning human anatomy general reference application. Students explore thousands of anatomical structures, musculoskeletal animations and quizzes.

### STEM Applications

More than 7 different applications allow students to create their own experiments, go through electricity concepts, explore the elements, learn abstract concepts and more!

### Conceptual Physical Science

Students have the opportunity to create their own experiments or use those created by zSpace to deepen their knowledge of Newtonian Mechanics and electricity concepts.
