ARTOME

Artome

The ideology of an installation-free and adaptable presentation technology has been, and still is, the foundation of the company. Today Artome offers portable plug-and-play smart furniture for presenting, learning, and much more. The goal of Artome is to plan and build audio-visual technology in a sustainable way and to make products that bring flexibility and easiness to the users without forgetting the aesthetic side.

Movable

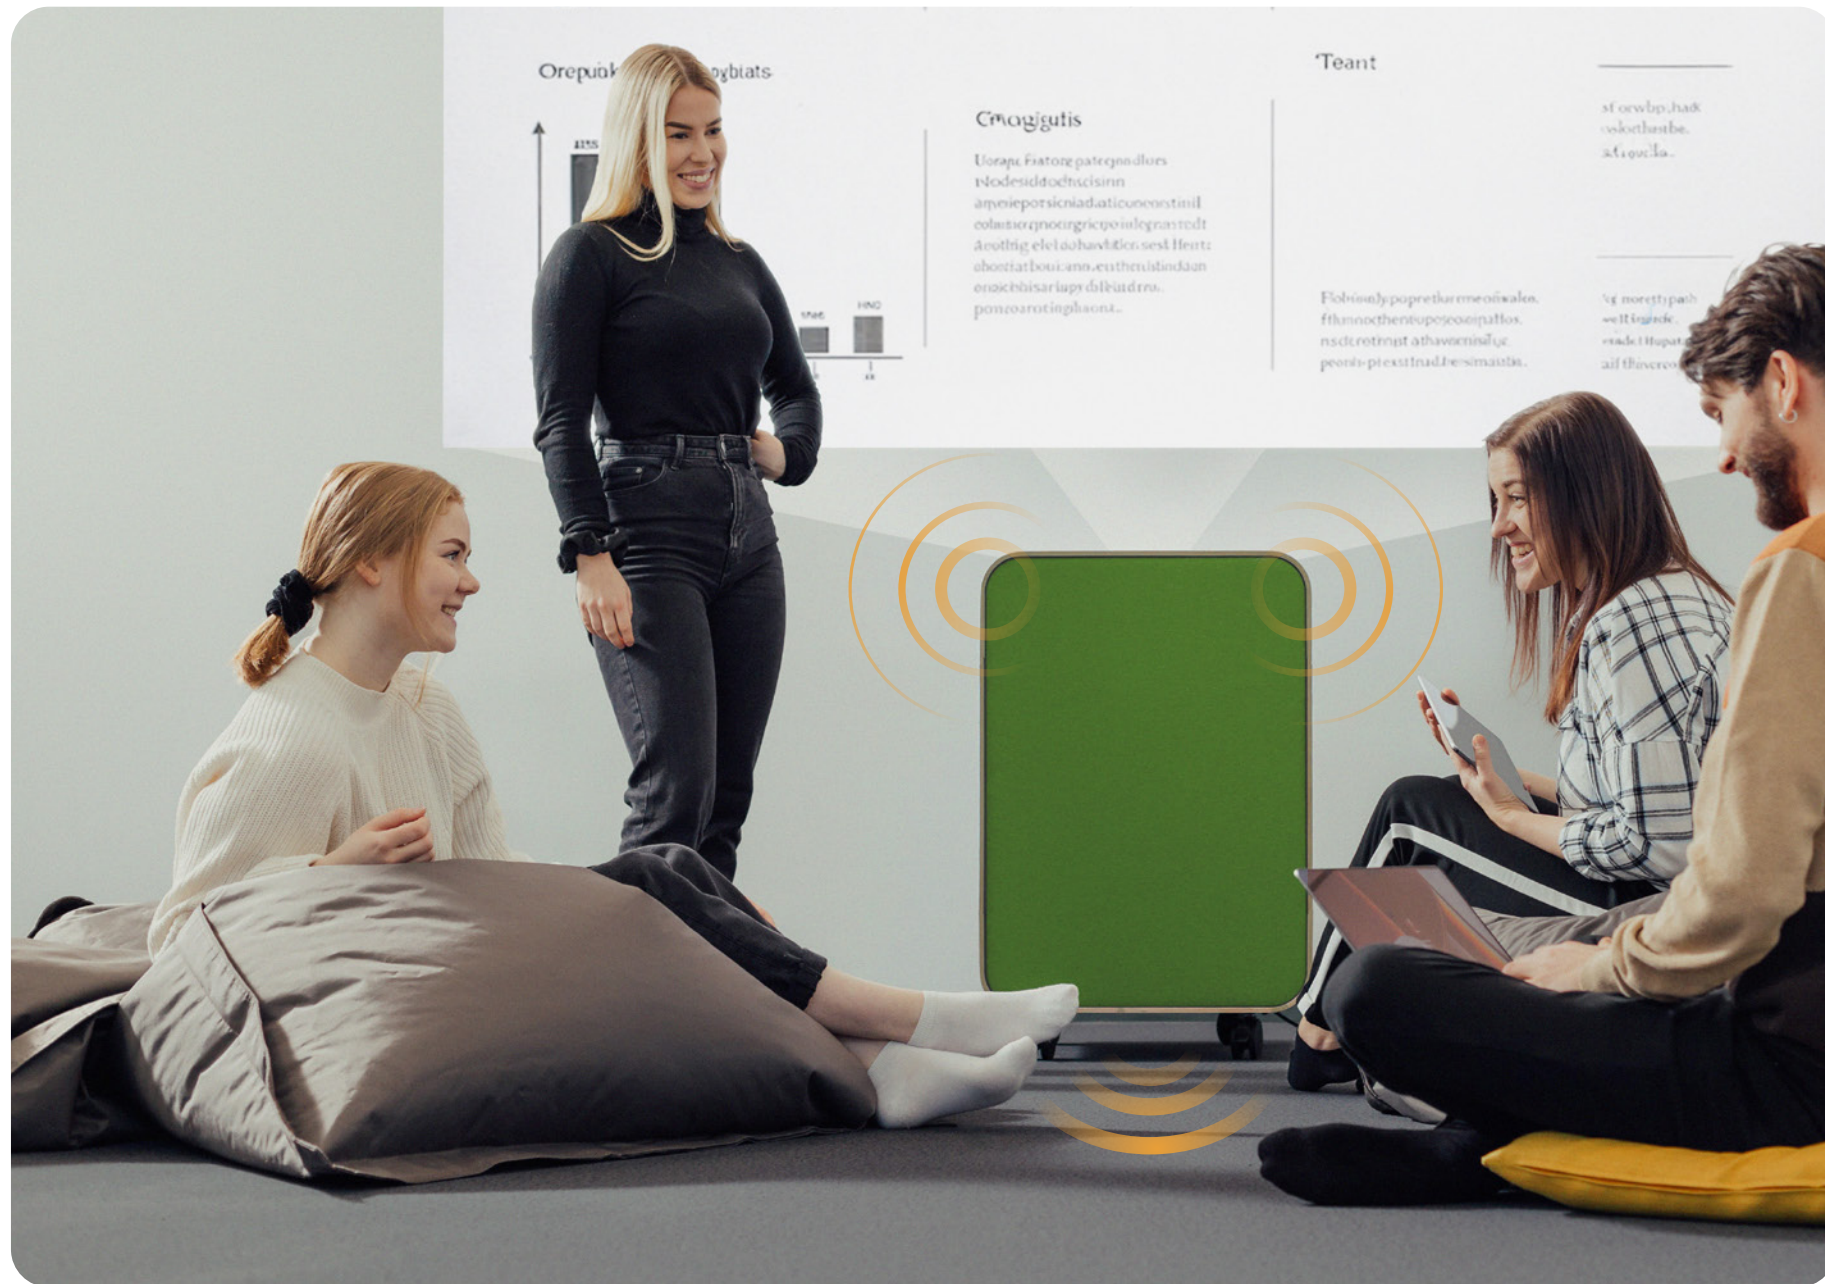

Artome provides portable audiovisual technology. Our installation-free products need only a wall or screen to project. Just add power.

All-in-one

Artome enables effortless presenting and videoconferencing with its Hybridock technology, a built-in Epson projector, and an embedded sound system. This combination ensures seamless integration and compatibility with additional technologies, saving time and money in construction.

Easy

Artome makes communication easy for everyone in the room and remotely. Artome helps to maximize the utilization rate of adaptable spaces with adjustable image size and easy-to-use sound system with mics. It doesn't need any installation or additional software and you can easily operate it with your own device.

Artome Connect

This app transforms your smartphone or tablet into a remote control for Artome, allowing you to access all the features of Artome and more from the palm of your hand.

Control

Virtual 6-button controlpanel:
On/Off, Source, Volume control,
Freeze and Mute.

Settings

Control additional features of your
Artome product.

Updates

Firmware updates via the app
ensure the product stays
future-proof.

Support

Artome Connect gives fast
access to first level support.

Artome Installer

Artome Installer is a tool designed for AV professionals
to simplify projector installation on Artome products.
Artome Installer includes device management for
additional features.

Hybridock™

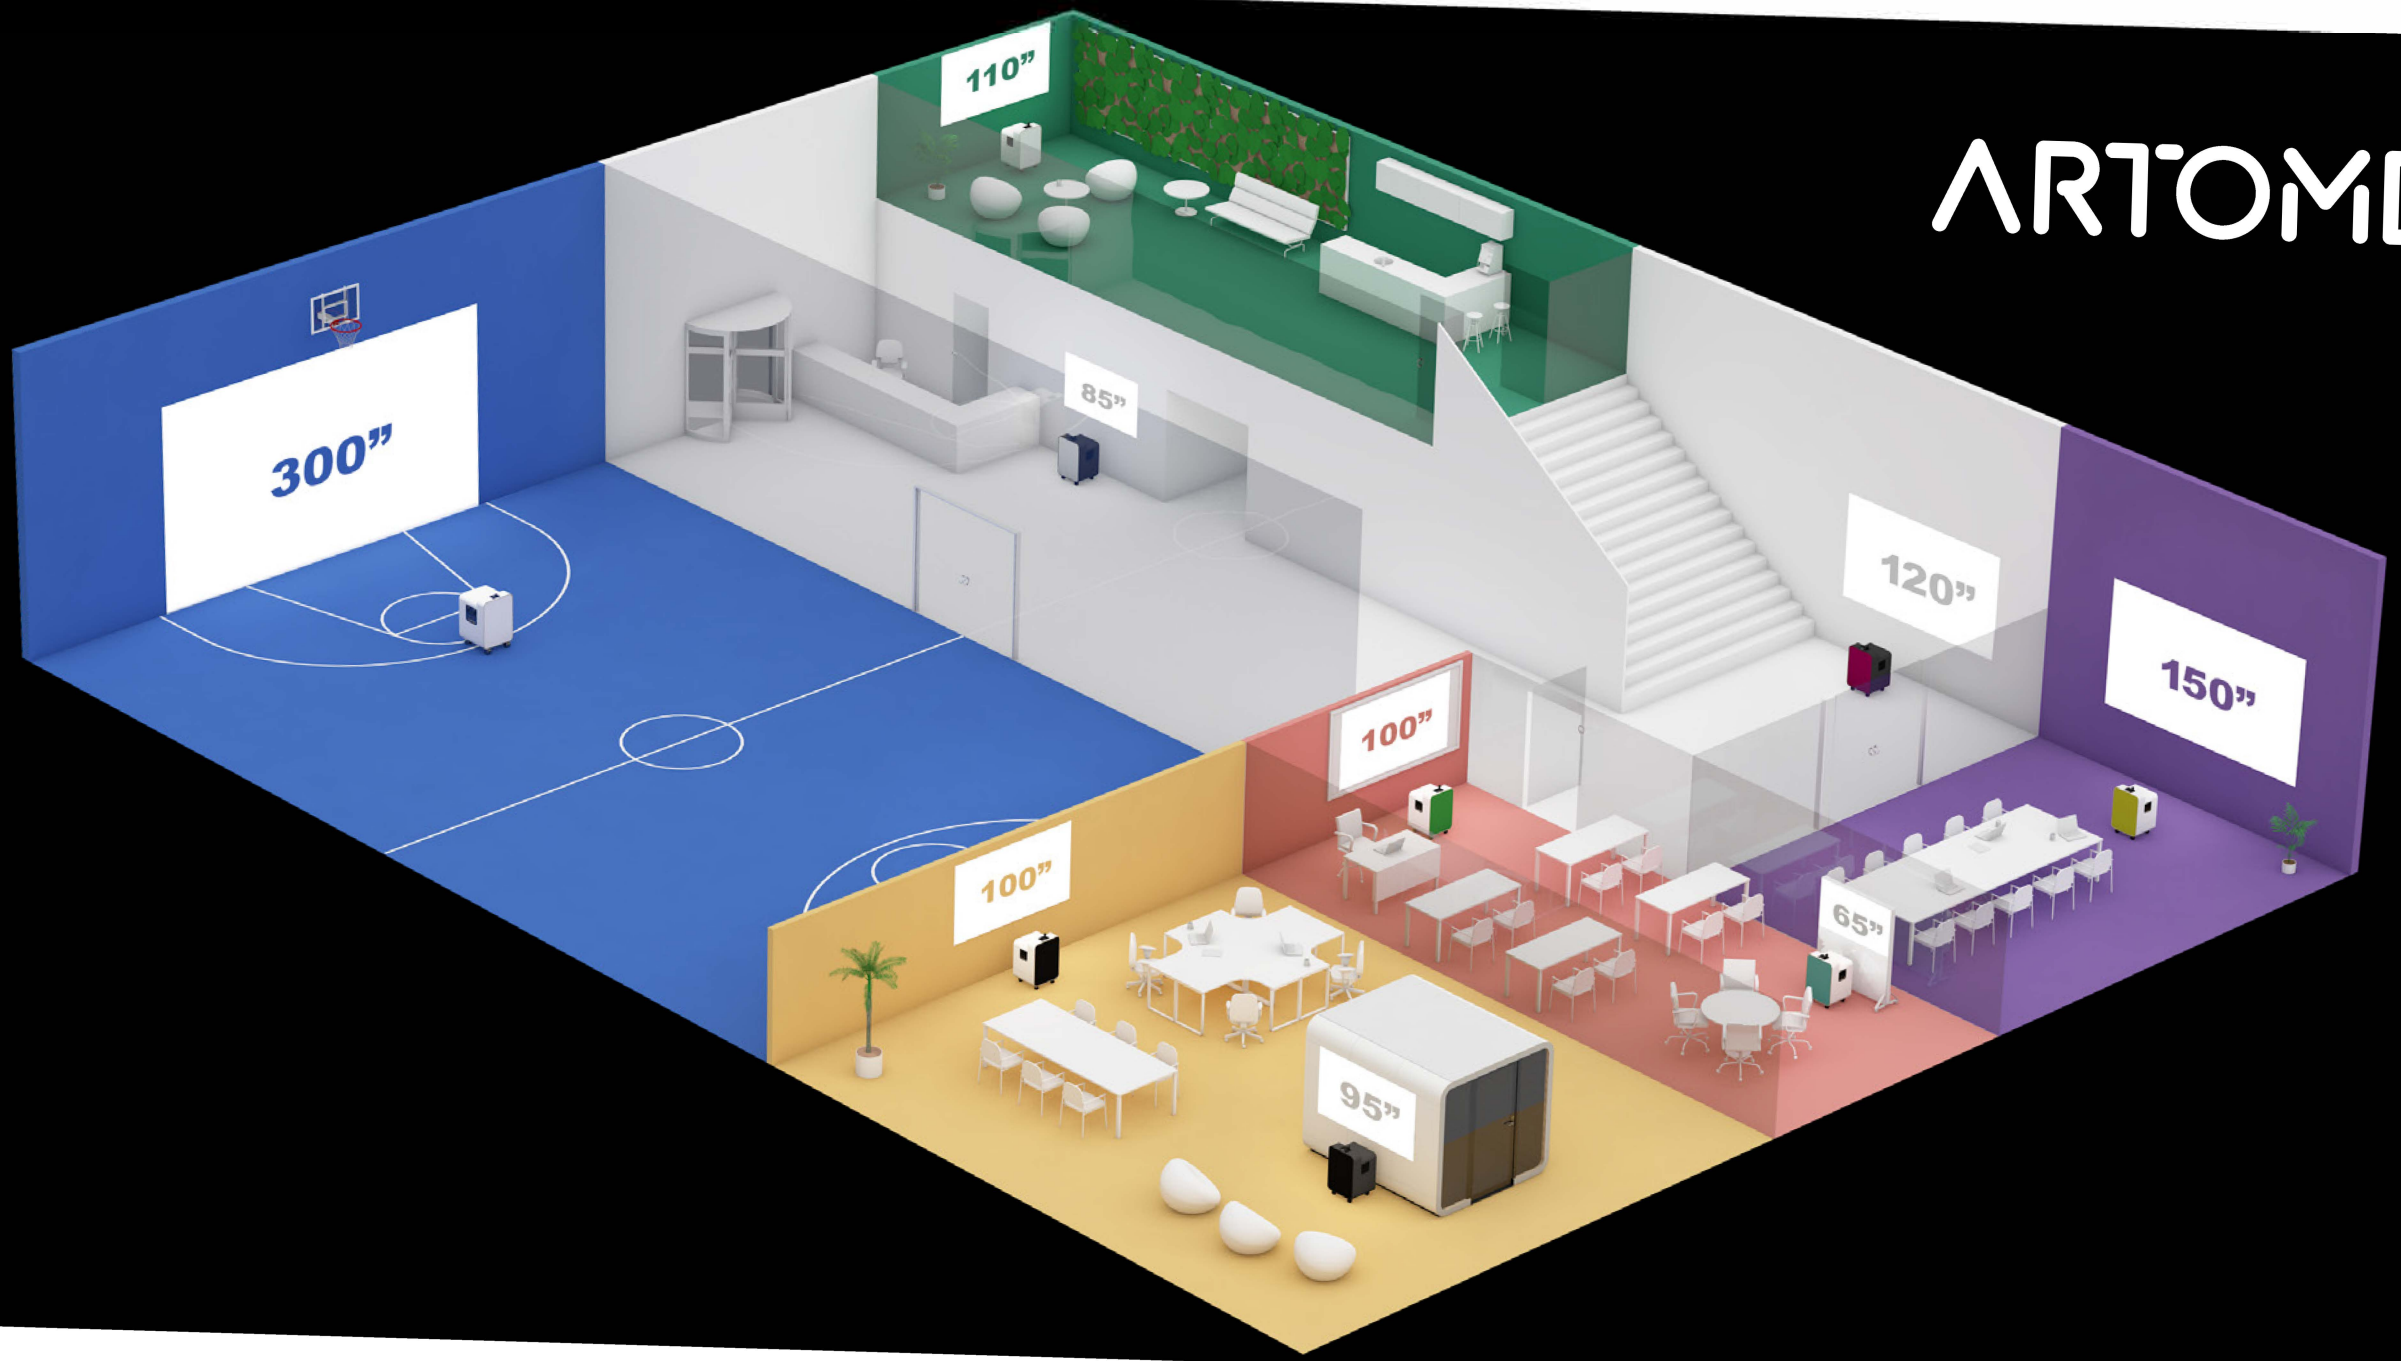

Artome is combining all the functions with our own technological innovation, Hybridock™. With this technology we are able to meet the requirements of Bring Your Own Device (BYOD) -usage with laptops and operating systems (Windows, MacOS, ChromeOS, Linux) without needing any additional installation of drivers or software.

Hybridock™ supports longer camera cables (over 1.8 meters) providing power directly via USB to avoid power loss. For audio, Hybridock™ enables connection of USB microphones or speakerphones for small meetings. In larger settings, it accommodates up to two microphones, ensuring high-quality sound is transmitted to your laptop and video conference.
